THE JOURNAL
of the Acoustical Society of America

INDEX TO VOLUME III

JULY, OCTOBER, 1931—JANUARY, APRIL, 1932

INDEX TO VOLUME III

A

ABBOTT, E. J.: Measurement and frequency analysis of sound from large reduction gear units, (Abstract) 6

—— Noise specification for large reduction gears in terms of physical units, 445–482

ALDERMAN, GEORGE W.: (see Jones, Arthur Taber), 297–307, (Abstract) 5–6

ANDREE, C. A.: Approximations in determining the total absorption of a room, (Abstract), 314–315

—— Effect of position on the absorption of materials for the case of a cubical room, 535–551

—— (see Norris, R. F.), (Abstract) 312

B

BALLANTINE, STUART: Technique of microphone calibration, 319–360, (Abstract) 8

BARNES, GARNETT F.: Investigation of gamma in a mixture of gases, 579–590

BARROW, W. L.: On interference elimination with the warble tone, 562–578

BARTON, HENRY A.: American Institute of Physics, (Abstract), 312

BEDFORD, A. V.: Planetary reduction gear system for recording turntables, 207–221, (Abstract) 7–8

BIDDULPH, R.: (see Shower, E. G.), 275–287, (Abstract) 7

C

CHRISLER, V. L., W. F. SNYDER, and C. E. MILLER: Measurements with a reverberation meter, (Abstract) 17

COLWELL, R. C. AND J. K. STEWART: Mathematical theory of vibrating membranes and plates, 591–595

—— Vibrations of a metallic plate, (Abstract) 6

D

DELSASSO, L. P.: New acoustic analyzer: Determination of the sound spectra produced by aircraft in flight, 167–178

DORSEY, HERBERT GROVE: Transmission of sound through sea water, 428–442

E

EYRING, CARL F.: Reverberation time measurements in coupled rooms, 181–206

F

FARNHAM, R. E.: Application of lamps for sound picture recording and reproducing, (Abstract) 311

FAY, R. D.: Plane sound waves of finite amplitude, 222–241, (Abstract) 9

FREDERICK, H. A.: History of the microphone—Its development and use, (Abstract) 8

—— Development of the microphone, (Supplement to July, 1931) 1–27

G

GRAHAM, HENRY T., JAMES W. STEPHEN AND DONALD A. LAIRD: Influence of noise stimuli upon the normal secretion of saliva and gastric juices, (Abstract) 315

H

HALL, WILLIAM M.: Comments on the theory of horns, 552–561

HAM, LLOYD B. AND JOHN S. PARKINSON: Loudness and intensity relations, 511–534

—— AND JOHN S. PARKINSON: Theoretical expression relating loudness and intensity, (Abstract) 311–312

HANSON, O. B.: Microphone technique in broadcasting, 81–93, (Abstract) 9

HANSON, R. L.: Reverberation characteristics of sound pictures sets and stages, (Abstract) 313–314

—— Liveness of rooms, (Abstract) 318

HERSHBERGER, W. D.: Theory of supersonic interferometers, 263–268

HOPPER, F. L.: Determination of absorption coefficients for frequencies up to 8000 cycles, 415–427, (Abstract) 313

HUBBARD, B. R.: Influence of atmospheric conditions upon the audibility of fog signals, 111–125

HUNT, FRANKLIN L.: Book review, 308

INDEX

J

JONES, ARTHUR TABER AND GEORGE W. ALDERMAN: Further studies of the strike note of bells, 297–307, (Abstract) 5–6

K

KELLOGG, EDWARD W.: Means for radiating large amounts of low-frequency sound, 94–110, (Abstract) 10

KNUDSEN, VERN O.: Effect of humidity upon the absorption of sound in a room, and a determination of the coefficients of absorption of sound in air, 126–138

—— Effect of humidity upon the absorption of sound in a room, (Abstract) 11–12

—— Effect of form on the reverberation of sound in rooms, (Abstract) 314

L

LAIRD, DONALD A., EMORY W. TAYLOR, AND HERMAN H. WILLE, JR.: Apparent reduction of loudness, 393–401

—— (see Taylor, Emory W.), (Abstract) 315

—— (see Graham, Henry T.), (Abstract) 315

LEET, LESLIE N.: Characteristic sound producers of the organ, (Abstract) 4

——— Organ pipes, 242–262

M

MARVIN, H. B.: On the loudness of noise, 388–392, (Abstract) 317

MASSA, FRANK (see Wolff, Irving), (Abstract) 9–10

——(see Wolff, Irving), (Abstract) 317–318

MAXFIELD, JOSEPH P.: Some physical factors affecting the illusion in sound motion pictures, 69–80, (Abstract) 10

MEYER, MAX F.: Salient features of the functioning of the cochlea, with demonstration of a transparent hydraulic model, (Abstract) 7–8

MILLER, C. E.: (see Chrisler, V. L.) (Abstract) 12

MILLER, DAYTON C.: Woodwind musical instruments, (Abstract) 4

—— Acoustic design of Severance Hall, (Abstract) 312–313

N

NORRIS, R. F.: Application of Norris-Andree method of reverberation measurement to measurements of sound absorption, 361–370

——— AND C. A. ANDREE: Application of the Norris-Andree method of reverberation measurement to measurements of sound absorption, (Abstract) 312

O

OLSON, HARRY F.: Mass controlled electrodynamic microphones: the ribbon microphone, 56–68, (Abstract) 9

—— Uni-directional ribbon microphone, (Abstract) 315–316

O'NEIL, H. T.: (see Sivian, L. J.), 483–510, (Abstract) 316–317

ORTMANN, OTTO: Physical aspects of piano tone, (Abstract) 3–4

P

PARKINSON, JOHN S.: Experimental judgments of relative loudness by a number of observers as related to the decibel scale, (Abstract) 7

—— (see Ham, Lloyd B.) 511–534, (Abstract) 311–312

PETZOLD, ERNST: Regulating the acoustics of large rooms, 288–291

POHLMAN, A. G.: Acoustic insulation and cancellation effects at the basilar membrane, 269–274, (Abstract) 7

R

REDFIELD, JOHN: Minimizing discrepancies of intonation in valve instruments, 292–296, (Abstract) 5

RITCHIE, EARLAND: Transmission of sound through apertures, 402–414

ROSS, IRA G.: Weighting of sound insulation data against frequency, (Abstract) 313

S

SABINE, PAUL E.: Critical study of the precision of measurement of absorption coefficients by reverberation methods, 139–154, (Abstract) 12–13

—— Device for direct measurement of sound absorption coefficients, (Abstract) 11

SAWYER, C. B. AND A. L. WILLIAMS: Demonstration of acoustic properties of Rochelle salt, (Abstract) 311

SEVERIN, C.: (see Wood, H. I.), (Abstract) 311

SHOWER, E. G. AND R. BIDDULPH: Differential pitch sensitivity of the ear, 275–287, (Abstract) 7

SIMMONS, LOUIS: Standardization in teaching the control of the human voice in speech and in song, (Abstract) 4–5

SIVIAN, L. J. AND H. T. O'NEIL: On sound diffraction caused by rigid circular plate, square plate and semi-infinite screen, 483–510, (Abstract) 316–317

SNOW, W. B.: Audible frequency ranges of music, speech and noise, 155–166; (Abstract) 10

SNYDER, W. F.: (see Chrisler, V. L.), (Abstract) 12

STANTON, G. T. AND J. E. TWEEDDALE: Noise survey of the rapid transit lines of New York City, 371–387; (Abstract) 316

STEPHEN, JAMES W.: (see Graham, Henry T.), (Abstract) 315

STEWART, J. K.: (see Colwell, R. C.), 591–595

T

TAYLOR, EMORY W. AND DONALD A. LAIRD: Apparent reduction of intensity level of noise (Abstract) 315

—— (see Laird, Donald A.), 393–401

TAYLOR, JOHN BELLAMY: Open pipes, stopped pipes and double stopped pipes, (Abstract) 5

—— Control of pitch in wind instruments, (Abstract) 317

THURAS, A. L.: (see Wente, E. C.), 44–55; (Abstract) 8–9

TWEEDDALE, J. E.: (see Stanton, G. T.), 371–387; (Abstract) 316

W

WATSON, E. M.: (see Wood, H. I.), (Abstract) 311

WATSON, F. R.: Reduction of noise in subways, (Abstract) 11

—— Bibliography of acoustics of buildings, 14–43

—— Acoustic adjustment of curved walls in auditoriums, (Abstract) 13

—— Book review, 443

WENTE, E. C. AND A. L. THURAS: Moving-coil telephone receivers and microphones, 44–55

—— AND A. L. THURAS: An improved form of moving coil microphone, (Abstract) 8–9

WHITE, WILLIAM BRAID: Musical scale and its tuning, (Abstract) 3

WILLE, HERMAN H. JR.: (see Laird, Donald A.), 393–401

WILLIAMS, A. L.: (see Sawyer, C. B.), (Abstract) 311

WOOD, H. I., C. SEVERIN, AND E. M. WATSON: Incandescent electric lamps for sound recording and reproduction, and their characteristics, (Abstract) 311

WOLF, S. K.: Acoustics of large auditoriums, (Abstract) 314

WOLFF, IRVING AND FRANK MASSA: Some uses of pressure gradient microphones for acoustic measurements, (Abstract) 9–10

—— AND FRANK MASSA: Direct measurement of sound energy density and sound energy flux in a complex sound field, (Abstract) 317–318

BOOK REVIEWS

RECORDING SOUND FOR MOTION PICTURES. Edited by Lester Cowan for the Academy of Motion Picture Arts and Sciences. 308

PLANNING FOR GOOD ACOUSTICS. Hope Bagenal and Alex. Wood. 443

ACOUSTICS OF BUILDINGS AND THE PREVENTION OF VIBRATION AND NOISE. Samuel Lifshitz. 596
